

Price List 2008

The prices inside can be changed without any notice due to rate changes, higher material costs or other circumstances outside Fishingflies' control.

Now it's time for us all to be fly fishing in front of the fireplace or by the fly tying cabinet.

A quick look through the fly boxes shows how many flies you've lost during the season and what you have to fill up with again or what you have to retye.

Here you'll find what you need if you don't want to tie your own flies.

If we haven't got it, we'll fix it, if you just give us an old fly or a recipe.

If you need fly tying materials we also got that, but you'll find it on the web:

<http://www.fishingflies.eu>

Light Lines!

News in the shop!

Nymph Head Beads - the best tungsten beads you can have for nymphs, streamers and various bugs. Shiny, heavy, and with eyes. Off course we also have flies tied with the new Nymph Head Beads.

Tube flies tied on colored brass tubes and colored plastic tubes as well as normal uncolored plastic tubes. We also have the material you need to tie your own tube flies.

Next Generation Dub - something quite fantastic for your flies. Ecological, from plants, soft and well moving in water. You can get it in brushes for streamers, thread for nymphs and dubbing for all sorts of flies.

Dubbing brushes, and soft dub brushes, ready to wind on the hook. Makes your fly tying easier and faster. Probably also better. You can make a hares ear pupa in seconds.

Czech Nymph material. You can find dubbings, back material, hooks, wire and whatever you need for your Czech Nymphing.

There are always some new flies. Tuffleye pupas, larvas and nymphs. Flies with wings from Stalcups Medallion Sheeting, Extreme colored feathers and so on. All new things you'll find on the web - <http://www.fishingflies.eu> (in English) or <http://flugfiske.ehnstrom.se/material> (partly in English but most Swedish)
